

TROPICALLY ADAPTED *for* **TROPICAL PERFORMANCE**

Lot 3 Marellan Ardie

Marellan Shorthorns
"Bred for Bos Indicus Cows"
BULL SALE

Tuesday 30th Sept 2025

On Property "Emerald Downs" Emerald

Dear Beef Producers,

It is with great pleasure that we invite you to our 2025 "Bred for Bos Indicus Cows Bull Sale, online and on-property. The Sale commences at 11am, with inspection from 8am on Sale Day, or any other time by appointment.

It is a great time to be part of the beef industry, with producers starting to receive some of the benefits of their hard work. Now more than ever is the time to focus on the long term projectory of our herds and industry.

It has been exceptionally pleasing to receive so many good reports of the progeny of our Marellan Shorthorn bulls over Bos Indicus Cows in the last 12 months. It's great to see that your Bos Indicus Cows and our Shorthorn bulls are forming a profitable and potent combination. We continue to strive for **Industry Leading Selection Pressure**, to instil in our herd more genetic gain and northern industry relevance. We believe that more Genetic progress is made in Adversity rather than Prosperity.

Please Note that this year's sale is both on farm and online, livestreamed through Auctions Plus. Videos of the bulls will be available approx. 5-7 days before, via www.marellan.com.au or Marellan Shorthorns Facebook or Auctions Plus. If you are intending on using Auctions Plus on sale day, please ensure that you are registered to do so.

About the Bulls: On offer will be 58 Shorthorn Bulls. All these bulls have been blooded and have been fully vaccinated with 3-day, Vibrio, Pestiguard and 7 in 1. The bulls have been **Morphology Semen Tested** and up to date weighs and scan will be available before the sale. We are very pleased with this year's bulls. These bulls represent the very best in Shorthorn genetics, which have been bred for generations to prosper in the Queensland environment. **PLEASE NOTE: Marellan Shorthorn bulls are grass-fed paddock bulls, NO GRAIN – NOT EVER.** We think that this policy is in the best long-term interests of both our business and yours. This inevitably means that the bulls may have lighter weights and lower scans than you may see at other sales.

Our genetic evaluations are done with BreedPlan, the Tropical Composite Register & ReproBI. Meaning our genetic evaluations will be a done in our backyard, in comparison to our environmental peers. See Page 36 for more info.

Yours sincerely,
Lincoln & Lisa Job and Family

Bred for Bos Indicus Cows!

Sale Information

Inspection: Inspection will be from 8am on sale day or any other time by appointment. On Property & Online: The sale will be On-Property at “Emerald Downs”. The Sale will also be on the AuctionPlus selling platform. Video’s of the Bulls will be online by 5-7 days prior to the sale.

Accommodation: Emerald has numerous accommodation options.

Airport: “Emerald Downs” is situated only 10km from the Emerald Airport. Please call Lincoln (0404 08 34 38) or Lisa (0411 311 323) if you would like us to arrange for you to be picked up from the airport.

Breeding Soundness: All bulls will be Semen Morphology tested and examined for reproductive and structural soundness by Wise Repro and Rocky Repro.

Supplementary Sheet: Supplementary Sheets will be available late in the week leading up to the Sale. Bulls will be weighed, scanned for EMA, IMF, Marble Fleck and Fat cover. Scrotal measurements have been done by vets with the ‘reliable’ tension measurer, in accordance with the Australian Cattle Veterinarians.

Delivery: We will endeavour to help co-ordinate efficient delivery of the bulls where required. Trucks are welcome on sale day. All bulls sold outside of the ticks will be delivered and presented clean to the clearance dip at the vendor’s expense.

Health: All bulls have been vaccinated with 7 in 1, Pestiguard, 3-day and Vibrio. All bulls have been blooded with 3-germ. The Central Highlands is ticky country; consequently, all bulls have been exposed to ticks on numerous occasions and will need to be cleared if they are sold to a tick free area.

Delayed Payment: Delayed payment may be available to some producers. Please speak to Lincoln prior to sale day.

Mobile Phones: “Emerald Downs” has very good mobile phone coverage.

Directions: “Emerald Downs” is located just north of Emerald on the Gregory Highway. Please see inside the back cover for a map.

Sale Bulls: Sale bulls have been prepared for their working lives, under our strict Selection Pressure polices. They are genuine grass fed, paddock reared bulls that have undergone intense selection pressure. Consequently, they will not have the finish that you may see at other sales. We are determined to ensure that our bulls can survive and thrive in Central, North and Western Queensland, rather than ‘look good’ on sale day.

All sale bulls are registered with the Tropical Composite Register. With ‘Shorthorn Beef’ they have various status ranging from Unregistered Herd Bulls to HBR. If registration status is an issue to you please speak to Lincoln before the sale.

Semen Rights: We have collected semen from a limited number of sale bulls. We retain **100% SEMEN RIGHTS ON ALL LOTS**. It is most likely that this will be absolutely irrelevant for virtually all buyers but please speak to Lincoln if you require any clarification.

GST: 10% GST will be added to the knock down price.

Performance figures & DNA Testing: We have made the exciting decision to return to Breedplan for genetic evaluation. DNA data has been submitted to Black Box to produce ReproBI GBV’s.

How to register as an AuctionsPlus user/buyer

1. To sign up, fill in your details & create a security PIN.
2. Verify your email and phone number.
3. Enter your PIC number, ABN & business details if applicable.
4. Carefully read and accept our user rules and responsibilities.
5. Complete the user quiz.
6. Submit your request to our team.

Industry Leading Selection Pressure – to Increase your bottom line \$

Our breeding philosophy is pretty simple, start with the best genetics possible (& keep adding to that group), chuck them all in at the deep end and see who learns to swim...quickly. This approach is ultimately about your herd as much as ours. Because if our bulls don't excel in your herd, we don't have a business. Feedback is always welcome, both positive and negative. As this feedback helps to refine our breeding program.

'NO Grain – NOT Ever'

Marellan Shorthorns exists for the sustainability and profitability of our herd and our client's herds. Our 2023 sale bulls are genuine grass-fed paddock reared bulls. **NO Grain – NOT Ever**; it proves our bulls can handle the environment. **NO Grain – NOT Ever**; It ensures the bulls are not carrying excess weight, they don't need to be let down; our bulls are for breeding not for looking prime on sale day. We believe that not pushing a bull's skeletal structure to the maximum is best for longevity. **NO Grain – NOT Ever**; it's part of our wider selection pressure.

2025 Callide Dawson Beef Carcase Competition.

This year, the prestigious Callide Dawson Beef Carcase Competition at Tey's Biloela provided a great opportunity to benchmark the performance of the Marellan Shorthorn cattle.

Shorthorn X Brahman F1 Milk Tooth Bullocks. Part of the Marellan team in the 2024 Clermont Cattlemen's Challenge. This year's peers went into the Callide Dawson Beef Carcase Competition.

In class 5, the pen of grain fed steers, the Marellan Shorthorn X Kiaura Brahmans females took out the weight gain section. With 2 steers equal topping the weight gain section, gaining a mammoth 3.72kg per day.

The Marellan team averaged 3.48kg compared to the peer average of 2.45kg. No other entries had a higher weight gain than the Marellan average.

Lincoln insists the credit must be shared, "we were fortunate to purchase some very good quality Kiaura Brahman females a few years ago. Our bulls are only ever half the story".

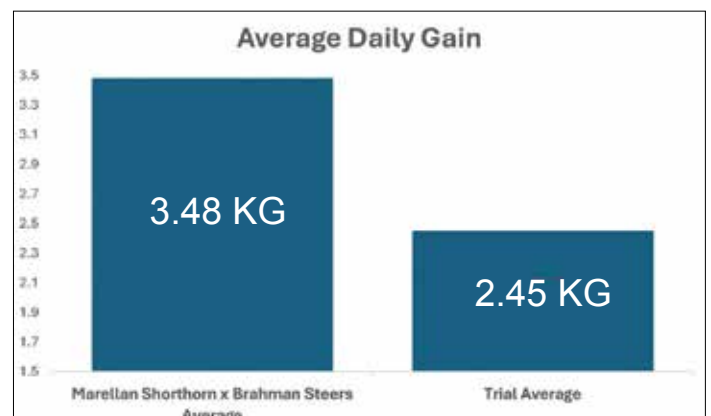

Figure 1. Callide Dawson Beef Carcase competition, class 5, Average Daily Gain.

It wasn't just in the weight gain section that the Marellan Shorthorn X Brahman steers excelled. They received well above average for Marbling points. What was particularly pleasing about this was that there were no entries with more Brahman Content.

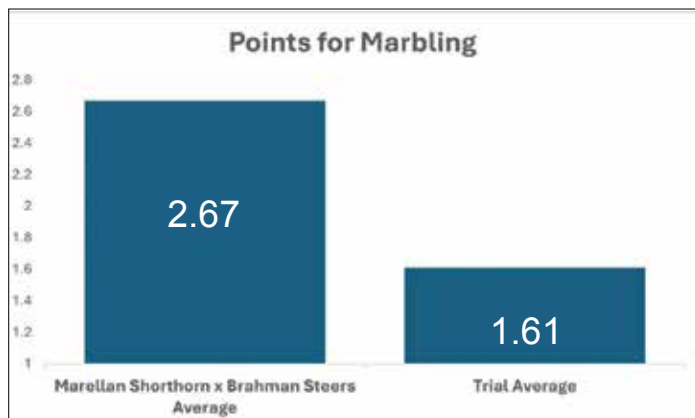

Figure 2. Callide Dawson Beef Carcase competition, class 5, points for Marbling.

Another highlight for Marellan was their entry in class 10, single grain fed Trade heifer. Their Droughtmaster X Marellan Shorthorn heifer scored the top MSA Index of 62.06, in a class of 45 heifers.

Shorthorns in the Ticks

We are determined to produce a tropically adapted Shorthorn herd in the ticks. We want our herd to survive and thrive in an environment that is similar to our client's herds. We use environmental selection pressure to make our cattle even more industry relevant. There are very few British Bred Bull breeding herds in the country that are in the ticks. Breeding a tropically adapted Shorthorn herd is not easy, but that's our aim. To help achieve this, environmental selection pressure is at the heart of our breeding philosophy. To have Shorthorns in the ticks we apply **Unique Selection Pressure** within our herd. We have and are monitoring the tick levels on different individuals and lines within our herd to identify and then propagate those that have the lowest tick burden and highest industry relevance for the north. Our aim isn't to have Shorthorn cows that need constant intervention, but to have a herd of Shorthorn Females that get no more care and attention than the majority of Bos Indicus herds. As stud breeders we believe that our selection pressure must be harder than our clients, to help ensure that our bulls provide genetic gain for their new owners.

Maternal Selection Pressure – Focussed on Fertility

Selection Pressure is at the absolute core of our breeding philosophy. When immense selection pressure is combined with the pursuit of elite genetics, it becomes the mechanism by which the value of a herd is ultimately determined. It is only those that remain after a heavy selection pressure that we want to breed from; the cream rises to the top. Adversity is the only genuine time where superiority is proven.

Heifer Bull Status

We often get questions about the suitability of individual bulls to use over maiden heifers. Opinions vary greatly as to how much to back off performance for the first calf. Within our herd we try to walk that fine line between applying selection pressure, demanding live calves born unassisted and demanding that that calf is still a contributor to our herd. We want our herd to always lean on the side of greater selection pressure, whereas non-bull breeding herds have the scope to make more decisions for ease of management. The design of your breeding program is up to you, but we seek to simply provide information to allow for wise decisions to be made. Like nearly all breeding decisions, there are multiple influencing factors. The bull used on heifers are only part of the problem or solution. The information boxes for each bull has a box for 'Heifer Bull Status'.

There are different options.

HFC	This denotes bulls that were born as a Heifers First Calf. Some people use this as an extra guide to bulls suitable to use over heifers.
Cows Only	These are the bulls whose genotype and phenotype are bigger growth and bigger known birth size. We do not recommend that these bulls are used over maiden heifers.
Buyer Discretion	These bulls are bulls that would be fine to use over heifers in some circumstances. Some clients have used bulls successfully over heifers that fall into this category.
3 Star	Bulls that should be OK to use in most circumstances when used over heifers with good growth nutrition and management practices.
4 Star	A safer option for heifers joining assuming that other good management practises have been followed.
5 Star	A really safe option to use over heifers. Normally these bulls are lower performance than their peers.
